Capgemini partners with Diota to offer Augmented Reality Services as part of its Digital Manufacturing offer

Paris, March, 02 2017 – Capgemini Group, via its subsidiary Sogeti High Tech dedicated to industrial engineering and technological innovation, announces, as part of its Digital Manufacturing offer¹, a partnership with Diota, European leader in augmented reality software solutions in industry.

Only actor in the augmented reality market able to offer solutions directly connected to industrial information systems², Diota reinforces the performance of companies thanks to:

- the real-time accompaniment of complex human tasks by numerical instructions
- the optimization of the processes by the increase of the data resulting from the field observation
- reduction of errors and industrial cycle times
- the improvement of skills development and the sharing of know-how.

Diota technology is robust, precise, and without instrumentation. It works on three different media types: tablets, the proprietary projection system developed by their teams, and 3D glasses (or any other augmented reality system).

Capgemini and Diota can therefore provide to the manufacturing industry actors an integrated offer of digital solutions based on augmented reality. As part of this agreement, Diota offers its augmented reality software and hardware solutions as well as its expertise in deploying augmented reality solutions in conjunction with the PLM system.

¹ On 31 May 2016, Capgemini launched a [service offering](#) dedicated to the digital transformation of players in the industrial sector

² Directly connected to the different business software solutions (CRM: customer relationship - PLM: product lifecycle management - MES: manufacturing execution system in the workshop ...).

Capgemini provides its support engineering expertise to field operations on digital media, including augmented reality, and its ability to industrialize and deploy at a large scale these solutions, including:

- Identification and prioritization of use cases, framing and construction of the business case,
- Specification of the solutions in accordance with the customer's need,
- The development of specific functionalities based on DIOTA products,
- Engineering and realization of testing solutions,
- Integration of solutions within the client enterprise information system, the implementation of connectors with PLM and ERP solutions, the development and configuration of servers in the back office,
- Solutions security
- Deployment of the client environment,
- Users training,
- Support for change,
- Post-deployment customer support.

For Jean-Pierre Petit, Director in charge of the Digital Manufacturing offering at Capgemini : « *On a sector in profound change and in which the need for innovation is essential, we surround ourselves with the best specialists on the entire chain of design and production. Diota is now one of our key partners in driving complex industrial projects. We plan to invest jointly in the coming years around the design, development and making available on the market of new common solutions* »

Capgemini, through its Digital Manufacturing offering, helps companies improve their efficiency and productivity through the construction of smart and connected factories and products. To deliver these services, the Group relies on its digital center of excellence based in Mumbai (India), as well as on its three digital platforms located in North America, France and Germany.

About Capgemini

With more than 180,000 people in over 40 countries, Capgemini is a global leader in consulting, technology and outsourcing services. The Group reported 2015 global revenues of EUR 11.9 billion. Together with its clients, Capgemini creates and delivers business, technology and digital solutions that fit their needs, enabling them to achieve innovation and competitiveness. A deeply multicultural organization, Capgemini has developed its own way of working, [the Collaborative Business Experience™](#), and draws on [Rightshore®](#), its worldwide delivery model.
